

**HOW TO CHOOSE THE RIGHT BOW/STERN THRUSTER**

SELECTING BOW/STERN THRUSTER BY BOAT LENGTH							
Boat length in meters	Thruster model	Electric	Extended runtime	Retractable	Rimdrive	Ignition protected	Hydraulic
5,5-8,5m	25kgf						
6,5-10m	35kgf						
7,5-11,5m	45kgf						
8,5-12,5m	55kgf**						
9-13m	60kgf						
10-15m	75kgf						
12-17m	95kgf**						
14-20,5m	125kgf						
16,5-22m	160kgf**						
19,5-26m	220kgf						
20-26,5m	230kgf*						
22-29m	285kgf						
22-29	310kgf*						
27-34	410kgf*						
34-43m	550kgf*						

**NOTES:**

**THE ABOVE TABLE IS FOR GENERAL GUIDANCE AND IT IS AN APPROXIMATION**

When choosing the right thruster you have to take into consideration factors like the boat's surface that is exposed to the wind, the hull shape position of the thruster etc.

\*\* Available as hydraulically and electrical driven bow/stern thruster

\* Only available as hydraulically driven bow/stern thruster

Extended runtime models: Can operate continuously for up to 7 minutes.

**STERN THRUSTERS:** The Stern thruster may be a size smaller than the Bow thruster.
