TOLERANCE (+2.5cm/+5.5in)	65-67 in	67-69 in	69-71 in	71-73 in	73-75 in	75-77 in	76+ in
<u>WOMEN</u>							
SIZE	XS	S	M	ML	L	XL	2XL
WEIGHT(KG/lbs)>	45-50 kg	50-55kg	55-60 kg	60-65 kg	65-70 kg	72-77 kg	75-80 kg
TOLERANCE (+2.5KG/+5.5lbs)	100-110 lbs	110-121 lbs	121-132 lbs	132-143 lbs	143-154 lbs	158-169 lbs	165-176 lbs
HEIGHT(in/cm)>	150-160 cm	160-165 cm	160-165 cm	165-170 cm	170-175 cm	175-178 cm	177-180 cm
TOLERANCE (+2.5cm/+5.5in)	60-63 in	63-65 in	63-65 in	65-67 in	67-68 in	68-70in	69-71 in

Semi Dry Suits 6mm/7mm

Men

Lady

Very little water enters the semi dry suits in contrast to the wetsuits that are filled with water completely. This is the reason semi dry suits are both thicker and more expensive and are usually worn mainly during the cold winter months or when one is in the water for a long time, such as dive instructors or professional divers.

Dry Suits

These suits are worn in very cold climates or even in temperate climates such as the Mediterranean by divers who spend too much time in the water during the winter months.

Usually there are undersuits which are worn beneath the dry suits.

The chest valve is also used to fill the suit with air from the HP port of the 1st Stage of the Regulator. The Dry Suits are always filled with air and no water enters into the dry suits.

Finally dry suits come with heavy duty dive boots.
