

HOW TO CHOOSE THE RIGHT FINS

Fins are divided into two basic types:

(i) Full pocket or Fullfoot

These are worn with bare feet. These are worn both by scuba divers and snorkelers

(ii) Open Heel

Open Heel fins are type of fins that are worn literally by scuba divers only and have to be worn together with boots.

However, there are some type of open heel fins which can be worn by snorkelers too – they are very soft on the heel and do not need to use boots; they can be used with bare feet.
